HOW DO I FIND AMI-TT4 FIRMWARE VERSION?

Please take a note before re-flashing the firmware, **UPGRADING THIS TO NEW FIRMWARE WILL ERASE CURRENT SETTINGS AND APPS CURRENTLY STORED IN THE TABLET.**

On the tablet, go to "SETTINGS", on the left side tap "About Tablet" to locate the Build Number (as per picture below shown as **20130202**). Compare with the latest version shown on our website and to see if you need to upgrade the firmware. The latest firmware will improve stability and compatibility with more apps from Google Play Store.
